**2 x Hydrangea 'Little White'. Pure white mopheads. £10 each or £15 for the pair.**

Healthy plants, approx height and spread 30" (75cm). If deadheaded, they continue to produce flowerheads throughout summer. They have been pot-grown, but I want to keep the pots so please either bring your own pots or old compost bags to transport them.

The photos above were taken in summer.

The photo on the left was taken a couple of weeks ago. The leaves will be dropping soon and they will reshoot in the spring.

**1 x Phlox 'Mount Fuji'. 2 Litre pot. £6.**

A tall border phlox with attractive apple-green foliage and scented, pure white flowers from late July onwards. Ht: 90cm (3ft). Spread: 45cm (18"). Very reliable and floriferous. Non-invasive and doesn't self-seed. Performs better than any other phlox for me here at Crockford. I have two, so I'm selling one of them and taking the other to our new garden.

Left photo is summer flowerhead. Photo on the right is the actual plant at the moment.
