

Mac Mini for Sale, £600

This unit was originally purchased in January 2025. This is the M4 model with 16Gb of RAM and 256Gb of internal storage. The unit is in perfect working order and spotless condition.

It's a great machine which can meet the needs of general use like web browsing and email but also do video editing, photo editing, music creation and any other creative tasks you get involved with. The M4 chip inside the machine is amongst the fastest made by Apple, and in heavy use shows no sign of slowing down.

The unit has connectors for:

- HDMI to your TV
- Ethernet (and WiFi built in)
- 3 USB-C ports on the back – you can run two monitors from this machine
- 2 USB-C ports on the front

You need your own screen, keyboard and mouse. I've used it with two monitors, a webcam, a headset, ethernet and two external SSD drives, all at the same time.

This unit costs £799 new from Apple with a 6-week delivery time. Almost any M4 Mac Mini is like fairy dust right now, hard to find.

I will provide any help you need to set it up and get going.
